

HAMISH

“EarlyEd provided our family with much needed support...”

EarlyEd was our very first link to receiving support after Hamish was diagnosed with Kabuki Syndrome at 20 months.

Hamish participated in a group program. He also received physiotherapy and speech therapy. He loved the social interaction. Hamish greatly benefited from EarlyEd.

EarlyEd provided our family with much needed support and direction to navigate the various disability services and plan for his transition to preschool and school.

Hamish attends Cromehurst Special School in Lindfield 5 days per week. He lives at home with his parents and 2 younger siblings and loves swimming at home with his family .

Hilary, Mother of Hamish
